Services Provided

Enterprise IT Solutions

- **Advisory**
 Advisory services provide decision makers with the necessary information to steer the enterprise in the desired direction and commit resources effectively.
- **Consulting**
 Information Technology Consulting Solutions assist organizations with the implementation, integration of equipment, applications, infrastructure and systems to run the enterprise.
- **Operations**
 Information Technology Operations Services support and maintain the operation of the enterprise on a daily basis.

Cyber Security Solutions

- **Advisory**
 Cyber Security Advisory Services utilize security standards (FISMA, HIPAA, ISO, FedRAMP and NIST) to measure risk within your enterprise.

Cyber security advisory solutions are designed to inspect, examine, and test the security controls applied within your enterprise and its components. Cyber Security Services provide detailed reports of weaknesses and findings based upon risk.

- **Consulting**

Cyber Security Consulting Services assist organizations with the implementation, integration and remediation of equipment, applications, infrastructure and systems that help protect the enterprise. Cyber Security consulting services design and architect solutions to protect the enterprise. Once the solution has been established we engineer and integrate the solution to operate within the enterprise. After the solution is operational we validate and verify that the solution is providing the protections as intended.

- **Operations**

Cyber Security Operations Services support and maintain the security posture of your enterprise on a daily basis.

- Security Operations Center (Monitoring and Management)
- Incident Response
- Information Assurance
- Data Loss Prevention and Protection
- Managed Services
 - System
 - Devices
 - Applications

Physical Security Solutions

- **Consulting/ Project-based**

Physical Security Consulting Services assist organizations with the implementation, integration and remediation of equipment, technologies, and infrastructure to protect the enterprise:

- CCTV
- Access Control (HSPD12/ FIPS201 Card Reader Systems)
- Intercom
- Intrusion Detection (Burglar Alarm)
- Infrastructure (Supporting Systems for Network Operation)
- Perimeter Security (Lighting, Gate Operators and Fencing)

Physical Security Consulting services design and architect solutions to protect the enterprise. Once the solution has been established we engineer and integrate the solution to operate within the enterprise. After the solution is operational we validate and verify that the solution is providing the protections as intended and that all personnel can access locations and system required.

- **Operations**

Physical Security Operations Services support and maintain the Physical Security posture of your enterprise on a continual basis with:

- Security Operations Center (Monitoring and Management)
- Break/Fix Support
- System updates/patching
- Dispatching

Physical Security Operations Services are delivered fireside or on a managed service basis to ensure that your enterprise has the necessary protections and support in place in order to support a secure, comfortable, worry-free workspace.
