Services

Information Technology

Enterprise Solutions

- **Advisory**

Information Technology Advisory Solutions utilize common standards (ITIL, ISO, NIST and others) to measure your enterprise with the following:

- Assessments
- Evaluations
- Audits

Advisory services provide decision makers with the necessary information to steer the enterprise in the desired direction and commit resources.

- **Consulting**

Information Technology Consulting Solutions assist organizations with the implementation, integration and remediate equipment, applications, infrastructure and systems that help protect the enterprise:

- Architecture

- Engineering
- Installation, configuration and integration
- **Operations**
Information Technology Operations Services support and maintain the operation of the enterprise on a continual basis with:
 - Problem, Incident and Event Management
 - Request Fulfillment
 - Access, Server Management and Support
 - Network, Storage, Backup and Infrastructure Management
 - Database and Applications Support and Management
 - Operations, Facilities and Data Center Management
 - Monitoring and Control

Cyber Security Solutions

- **Advisory**
Cyber Security Advisory Services utilize security standards (FISMA, HIPAA, ISO, FedRAMP, NIST and others) to measure risk within your enterprise with the following:
 - Assessments
 - Risk
 - Independent validation and verification
 - Evaluations
 - Baselines and standards
 - Audits
 - Compliance

Cyber security advisory solutions are designed to inspect, examine, and test the security controls applied within your enterprise and its components. Cyber Security Services provide detailed reports of weaknesses and findings based upon risk or other customized data. The data contained within the reports helps ensure compliance, reduce liability, mitigate risks and allows for resource allocation for issue remediation.

- **Consulting**
Cyber Security Consulting Services assist organizations with the implementation, integration and remediation of equipment, applications, infrastructure and systems that help protect the enterprise:
 - Architecture
 - Engineering
 - Installation, configuration and integration
 - Program Development
 - Data and System Categorization

Cyber Security consulting services design and architect solutions to protect the enterprise. Once the solution has been established we engineer and integrate the solution to operate within the enterprise. After the solution is operational we validate and verify that the solution is providing the protections as intended.

- **Operations**

Cyber Security Operations Services support and maintain the security posture of your enterprise on a continual basis with:

- Security Operations Center (Monitoring and Management)
- Incident Response
- Information Assurance
- Data Loss Presentation and Protection
- Managed Services
 - System
 - Devices
 - Applications

Cyber Security Operations Services are delivered fireside or on a managed service basis to ensure that your enterprise has the necessary protections in place to ensure confidentiality, integrity, availability of your data and limit liability.

Health Care Services

Eligibility Screening and Claim Processing Solutions

- Federal Programs
 - Medicare
 - Medicaid
- State Programs
 - Crime Victims
- Local Programs
 - Indigent
 - Other
- Private

Financial Services

Advisory Services

- Audits
- Assessment
- Evaluations

Consulting Services

- Accounting
- Representation and Litigation Support
- Analytics
- Tax Preparation

Financial Operations Services

- Bookkeeping
- Payroll Services

Delivery Models

Aspiryon offers our services in four ways to help meet your specific needs:

Project (Outcome-Based) - a defined scope, deliverables, start and completion dates are established to meet the defined needs and requirements.

Fireside (Staffing) – Aspiryon personnel are strategically positioned within the organization to assist with obtaining specific goals of the organization

Managed Services (Process Outsourcing) – Managed services are delivered on-site or off-site at Aspiron facilities and act as an extension of the enterprise for a specific purpose. Examples: Help Desk Operations, Security Operations Center (Monitoring and Incident Response), Configuration Management, etc.

Customized- customized solutions are usually hybrids of other existing delivery models or custom developed solutions that have highly specialized requirements and needs.
